DETAILED ACTION

Request for Continued Examination

1. The request filed on July 28, 2006 for a Request for Continued Examination (RCE) under 37 CFR 1.53(d) based on parent Application No. 10/777,562 is acceptable and a RCE has been established. An action on the RCE follows.
2. In view of the cancellation of claims 16-45, the objection of claims 16-45 is withdrawn. Claims 1-15 are pending.
3. In view of argument filed July 28, 2006, the objection of the specification is withdrawn.
4. In view of argument filed July 28, 2006, the restriction set forth under 37 CFR 1.176 permits the examiner to make a requirement for restriction, is withdrawn.

Non-Compliance

5. The amendment filed July 28, 2006 proposes amendments to claims 1-15 that do not comply with 37 CFR 1.173(b), which sets forth the manner of making amendments

in reissue applications. A supplemental paper correctly amending the reissue application is required.

Defective Oath/declaration

6. The reissue oath/declaration filed with this application is defective because it fails to identify at least one error which is relied upon to support the reissue application. See 37 CFR 1.175(a)(1) and MPEP § 1414. A new declaration is needed.

Applicants' argument filed July 28, 2006 has been fully considered, and the examiner finds it not persuasive because applicants fail to recognize that oath/declaration fails to point out specifically where in the prior art (with column and lines indicated) is considered anticipatory to the instant application, because the oath is related to a reference that is being argued. Currently, the oath is arguing on "Japanese Laid Open Patent Application (Kokai 10-33042) while the submitted reference is pertained to Hei 10-330412.

Art Unit: 1713

7. This application is objected to under 37 CFR 1.172(a) as lacking the written consent of all assignees owning an undivided interest in the patent. The consent of the assignee must be in compliance with 37 CFR 1.172. See MPEP § 1410.01.

A proper assent of the assignee in compliance with 37 CFR 1.172 and 3.73 is required in reply to this Office action.

8. Claims 1-15 are rejected under 35 U.S.C. 251 as being broadened in a reissue application filed outside the two year statutory period. It appears that applicant is broadening claim 1 by deleting the requirement that the catalyst is a "bulky" ligand metallocene catalyst. A claim is broader in scope than the original claims if it contains within its scope any conceivable product or process which would not have infringed the original patent. A claim is broadened if it is broader in any one respect even though it may be narrower in other respects.

9. Claims 1-15 are rejected under 35 U.S.C. 251 as being improperly broadened in a reissue application made and sworn to by the assignee and not the patentee. A claim is broader in scope than the original claims if it contains within its scope any conceivable product or process which would have infringed the original patent. A claim is broadened if it is broader in any one respect even though it may be narrower in other respects.

Art Unit: 1713

10. Claims 1-15 are rejected as being based upon a defective reissue

Oath/declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the Oath/declaration is set forth in the discussion above in this Office action.
